

**Portfolio Studies Currently Open at Bradford District Care NHS Foundation Trust as at August 2021**

If you are interested in taking part in research, or knowing more about these studies please contact Research and Development email: [research@bdct.nhs.uk](mailto:research@bdct.nhs.uk)

Commercial/Non Commercial	Topic/ Care Group	Title of Study (acronym)	Summary	Study Lead	Local Collaborator/ Principal Investigator
Non-commercial portfolio	Adult Mental Health	DIAMONDS - Improving diabetes self-management for people with severe mental illness	Helping people with SMI to improve their Type II diabetes	Jason Cook	Dr Anita Mukundan
		National Confidential Inquiry into Suicide and Homicide by People with Mental Illness	A Nationally Driven study that looks to collect detailed clinical information on patients of mental health services who die by suicide, or commit homicide.	-	
		NIHR Mental Health BioResource for Depression and Anxiety	A research project exploring risk factors in people suffering from depression/anxiety using the NIHR BioResource database.	Angus Sturrock	Dr Gregor Russell
		Prevalence of neuronal cell surface antibodies in patients with psychotic illness	There is evidence that some cases of psychosis may be caused by a problem with the immune system. This study hopes to identify people for further investigation into this	Kim Evans	Dr Anitha Mukundan
	CAMHS	Child Anxiety Treatment in the context of COVID-19 (Co-CAT):  Enabling Child and Adolescent Mental Health Services (CAMHS) to provide efficient remote treatment for child anxiety problems	In the context of COVID-19, NHS Child and Adolescent Mental Health Services (CAMHS) face major challenges in providing psychological treatments that (i) work when delivered remotely, and (ii) can be delivered efficiently to manage an anticipated increase in referrals as social distancing measures are relaxed.	Zarina Mirza	Lisa Stead
		Picking up the Needs of Children when still young - research study to identify child autism and neurodevelopmental disorder at an earlier stage.	This is a research study to identify child autism and neurodevelopmental disorder at an earlier stage. We are looking at whether the Early Years Foundation Stage (EYFS) profile can be used as a screening tool for autism spectrum disorders (ASD). We want to test if the standard EYFS profile assessment procedure can identify those who are at risk of developmental problems such as ASD so that they can be referred for further assessments and support earlier.	Jason Cook	Sara Mansoor
		Sleep-Impulsivity-Behaviour (SIB) Study: examining pathways to self-harm in children with autism and intellectual disability	The project aims to better understand behaviour in children with autism and intellectual disability. In the future, the information obtained during this study could help the study team to identify ways in which we may be able to prevent the onset of particular behaviours that have a negative impact on the quality of life of children with autism and intellectual disability.	Zarina Mirza	Sue Lee
	Community Services	Clinical Characterisation Protocol for Severe Emerging Infection	A research study gathering information about service users from BDCFT who have been diagnosed as Covid positive.	Angus Sturrock	Dr Gregor Russell
		Online guided self-help for the management of binge eating in adults with Type 2 diabetes: intervention adaptation and pilot study	The study aims to produce online guided self-help for the management of binge eating in adults with Type 2 diabetes. The study involves recruiting participants through an online survey followed by inviting them to a co-design workshops.	John Vertannes	Cheryl Kirby
		Understanding mammalian biomineralisation in health and disease via a molecular dissection of the mechanisms underpinning Amelogenesis Imperfecta	The primary aim of this study is to identify genes that when mutated cause Amelogenesis Imperfecta, a disorder of tooth development.	Elizabeth Nyamadzawo	Dr Peter F. Day
	Older people	Understanding SARS-CoV-2 infection, immunity and its duration in care home staff and residents in the UK (VIVALDI STUDY)	This is a large prospective cohort study of care home staff and residents with repeat COVID testing for infection and detailed follow-up.	Angus Sturrock	Dr Gregor Russell
		Behavioural Activation for Social Isolation	This study aims to test whether a brief remotely delivered psychological intervention (Behavioural Activation, BA) is effective at preventing or mitigating depression and loneliness in older people with long-term conditions who are socially isolated in relation to Covid-19.	Elizabeth Nyamadzawo	Carlyn Boyce
		Clinical and cost-effectiveness of a New psychological intervention to support Independence in Dementia (NIDUS) for family carers and people living with dementia in their own homes: A randomised controlled trial	Study is about Family Supporting independence at home for people with dementia and invites family or friends who support someone living with dementia to try out a new intervention (NIDUS-family) to help people living with dementia stay independent and remain at home	Elizabeth Nyamadzawo	Mr Chris North
		Development of core outcome sets for effectiveness trials of interventions to prevent and/or treat delirium (Del-CORs):	Study goal is to develop international consensus on a core outcome set for research studies of treatments within a palliative care setting to prevent and/or treat delirium.	Elizabeth Nyamadzawo	Carlyn Boyce
		HOMESIDE: A home-based family caregiver-delivered music intervention for people living with dementia: a randomised controlled trial	The music programme aims to reduce behavioural and psychological symptoms of dementia as well as improve quality of life and well-being for both people living with dementia and their caregivers.	Angus Sturrock	Ioulia Zygouri
		Monitoring of Dementia Using Eye Movements	Rapid movements of the eye, known as saccadic eye movements provide a useful tool for discriminating between normal age-related changes in performance and those associated with Alzheimer's disease (AD)	Elizabeth Nyamadzawo	Dr Gregor Russell
		Problem Adaptation Therapy For Individuals with Mild to Moderate Dementia and Depression. The PATHFINDER Trial.	A randomised control trial evaluating the effectiveness of PATH Therapy for people with Alzheimer's disease and low mood/depression.	Angus Sturrock	Dr Gregor Russell
		The COUNTED Study - Communication about treatment options in Memory Assessment Services	A qualitative research study examining how discussions around dementia medication are carried out between clinicians and service users.	Angus Sturrock	Dr Gregor Russell
		The south Asian Dementia diagnosis PaThway (ADAPT) - an online toolkit of enhanced interventions	Staff from BDCFT Dementia services will be refining a package of intervention for people with dementia from South Asian communities.	Iftikhar Khan	Mr Chris North
		Other	Experiences of serious incidents in healthcare: An interview study with patients, families, healthcare staff and investigators.	This interview study will interview patients, families, investigators and healthcare staff (n=60) to explore individual experiences of whether and how patients and their families are involved in the investigation of serious incidents	Zarina Mirza
	Psychological impact of COVID - 19 - pandemic and experience: An international survey.		The aim of this survey is to better understand how the coronavirus pandemic and resultant restrictions/lockdown are affecting our day to day lifestyle. Anyone over the age of 16 with access to be able to complete this online questionnaire can take part.	Iftikhar Khan	Dr Gregor Russell
	UpLift: A randomised controlled trial to improve NHS staff wellbeing		The aim of UPLIFT is to compare the effectiveness of two psychological interventions for occupational burnout in health care professionals	Elizabeth Nyamadzawo	Dr Suzanne Heywood-Everett
