Important information for GPs referring to BDCFT Adult Community Speech and Language therapy Team

Bradford District Care Foundation NHS Trust (BDCFT) has changed the way in which GPs refer patients to the Adult community team for swallowing and communication assessment, in SystmOne and GP assist. We would like to reassure you that any difficulties accessing the new pathway have now been resolved.

In Assist, please click the **'Community Refs & Gateways'** tab at the top of the screen:

Under 'BDCFT Referrals' click the 'NEW SALT Adults Swallowing & Communication' button:

This will launch a protocol, and you will be guided, through appropriate questions, to complete the referral template. Please follow the on-screen questions.

Please ensure you use this process now, otherwise the referral may be rejected. The aim is to save time and reduce inappropriate referrals to this service. We thank you for your support with this.
